

COHESIVE

AUTOMATION, INC.

ALERTON®
AUTHORIZED DEALER

To Whom It May Concern:

Cohesive Automation has purchased and installed GE Telaire CO2 sensors for the last five years. We have installed approximately 5,000 GE Telaire CO2 sensors in schools with almost no returned sensors. Our customers are most happy with the performance, accuracy and reliability of these CO2 sensors. As a contractor, we have found the GE Telaire sensors to be simple to install and have extremely low failures and returns.

I would highly recommend GE Telaire CO2 sensors.

Sincerely,

Chris Hill
Cohesive Automation
